

Platform Migration and Modernization to Cloud with Cast

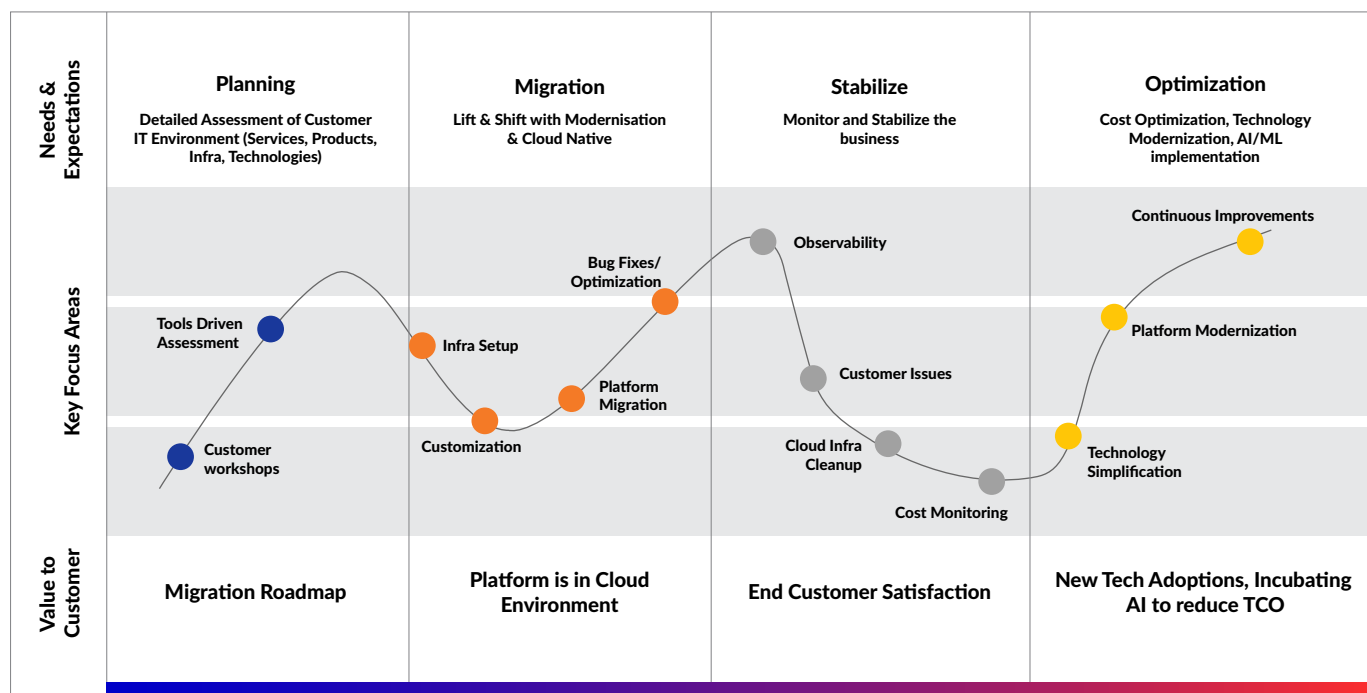

Accelerate Application Modernization and Migration Assessment to Cloud with CAST

Migration of legacy workload to a cloud environment can present several challenges in performance areas, the additional cost of operations due to legacy code architecture, and dependencies.

Agivant's team of cloud architects has extensive experience migrating complex platforms to the cloud. They utilize a three-step iterative process for modernization and migration.

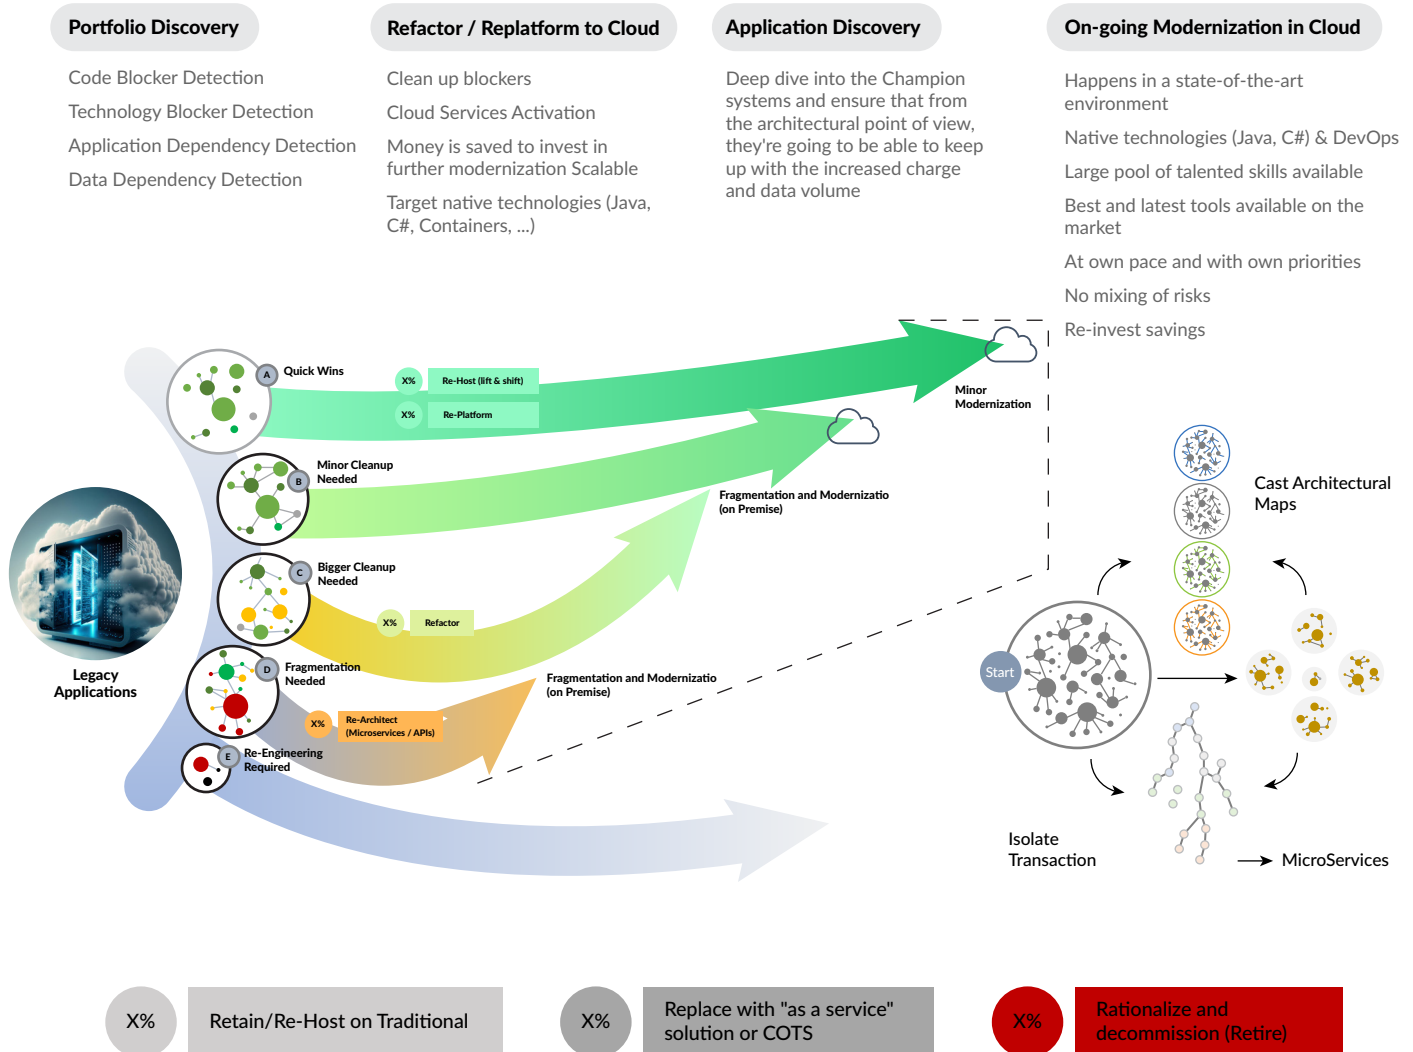

Cloud Migration Approach

Center of Excellence to Modernize and Migration to Cloud

Agivant Has Set Up a Strategic Partnership with CAST Software to Do Detailed Migration Planning And Helping Clients Execute Complex Migration & Modernization.

Migration: Execute with speed and quality, minimizing impact on client resources

Value to Customer

Agivant experts have rich industry experience migrating complex platforms to top-tier hyper scalers (Azure, AWS, GCP). Agivant with CAST tools delivers significant value to the customer:

- ▶ Detailed assessment of technologies, service dependencies, tech debt
 - ▶ CAST technologies scan hundreds of applications, automatically categorize them according to the Gartner 5Rs, detect cloud blockers, opensource risks, and deficient energy consumption patterns, recommend Cloud services, reserve-engineers detailed architecture maps of complex applications, guide dev teams on how to modernize fast and safe.
- ▶ Reduce Total cost of operations (TCO) by 25% to 30% through cloud services optimization, improve customer support cost, and AI-enabled Self Service Optimization.
